**SCAN ME**

**EPNC 2026** will bring together leading researchers and industry experts to exchange ideas, explore breakthroughs, and showcase innovative solutions and applications. Attendees will have the opportunity to engage with world-renowned scientists through keynote speeches, tutorials, and invited papers, making it an invaluable event for those at the forefront of the field.

**EPNC 2026** is inviting industry partners to participate as sponsors and exhibitors, providing an exceptional opportunity to connect with a highly targeted audience of power electronics and motion control professionals. Our tiered sponsorship packages offer comprehensive visibility, including prominent logo placement across digital and print materials, the official event website, on-site signage, acknowledgments during presentations, and the chance to showcase your products and deliver technical talks.

The **EPNC 2026** website is now live and will be consistently updated with event highlights, speaker announcements, and exhibitor news. The conference attracts a diverse group of researchers, engineers, and decision-makers from academia and industry across Europe and beyond, making it an ideal platform for brand exposure, recruitment, and lead generation. This is your opportunity to present your innovations, forge valuable partnerships, and promote the adoption of your solutions.

The strategically designed **exhibition** floor places your company at the heart of attendee activity, with coffee breaks and poster sessions located nearby, ensuring maximum exposure. Exhibitors can also take advantage of live demonstration opportunities, pre-event promotional efforts, and on-site lead capture tools to convert conversations into tangible business prospects.

Please check the sponsorship packages on the next page and for further information, contact us at: **epnc@diagnosolve.com** or **epnc2026@gmail.com**

## TOPICS

### Nonlinear Coupled Electromagnetic Phenomena

- Numerical methods and Formulations
- Multiphysics and Coupled Problems
- New trends in Electromagnetics

### Nonlinear Devices and Systems

- Modelling and Control of Power Electronic Devices and Converters
- Nonlinear Elements in Electrical Machines and Drives

### Electromagnetics for Energy

- Magnetic Materials and Passive Components for Power Electronics
- Wireless Power Transfer
- Renewable Energy Systems
- Energy Storage

### Bioelectromagnetics

- Modelling of biological interactions with electromagnetic fields
- Human Exposure Modelling and Measurements
- Electromagnetic Aspects in Medical Imaging
- Therapeutic application of electromagnetic fields

### Nonlinear Optics and Wave Propagation

- Nonlinear Optical Phenomena and Devices
- Modelling of Nonlinear Space-Time Electrodynamics
- Modelling of Nonlinearities in Optical Waveguides

### Additive Manufacturing for Electromagnetic Systems

- Magnetic Materials
- Conductive Materials
- Power Electronic Components
- Electrical Machines
